COLLABORATIVE METHODS
A MONTHLY NEWSLETTER

Dear [member_name_first],

Welcome to our September 2010 edition. This monthly newsletter showcases design solutions that The Schimberg Group provides to its clients. The Schimberg Group understands that collaboration is fundamental towards achieving best practices, sustainable success and **Extraordinary Results**.

President's Corner:

Going Up?

When it comes to keeping your building competitive, elevator cabs can be an afterthought, and can also paint a picture of disrepair throughout the rest of your facility if they're out of date. .. "If the cabs are original, and you're upgrading other [original] parts of the building, it's advisable that you upgrade the elevator cabs at the same time to complement the other building upgrades," say the professionals at HKA Elevator Consulting.

There are two components to upgrading an elevator cab. The first is cosmetic. The second is mechanical. Both have permitting implications, but mechanical upgrades require more attention and the elevator manufacturer to get involved. Cosmetic upgrades can be handled by any sub contractor or contractor, familiar with the codes and permitting. We recommend keeping the finishes maintenance free and minimizing the panelization for ease of future work. Upgrading the ceiling is always an easy way to provide a more sophisticated look.
